

QUICK SETUP®: TUBE STAND

COMPONENTS

Part A Base Plate

Part B Vertical Poles (marked 1-2 & 5-6)

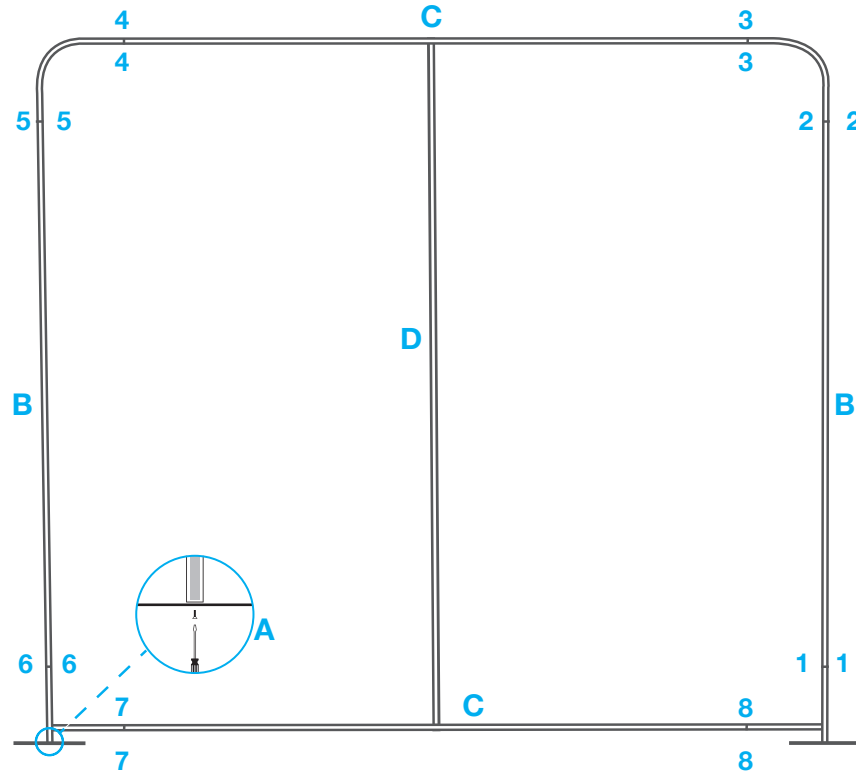

Part C Crossbars (marked 3-4 & 7-8)

Elbows to connect to crossbars (marked 3-2 & 4-5)

Part D Center stabilizer bar

StepRepeat® Installation Instructions

Step 1 Screw Bottom **L-Arm** into **Base Plates A** (performed 2x)

Step 2 Place Vertical Poles **B** 10 feet apart and insert into the base plates. The poles will insert into slots with matching numbers

Step 3 Extend All Crossbars **C** to 10 feet. Hook crossbar with 3-4 markings into the two elbows with matching numbers, and insert into the vertical poles

Step 4 Insert lower crossbar marked with 7-8 into the base plates with corresponding numbers

Step 5 Insert center stabilizer bar **D** into top and bottom cross bar

Step 6 To install the graphic, slide the graphic from the top of the frame towards the bottom. Zip the bottom of the graphic.

Yes... we know you think everything is perfect, but do please check the package contents carefully, for any missing parts and familiarize yourself with the components required for installation. Finding something missing, broken or unsure how to set up your system on show day, is not good.

Call us at **800.538.6544** for any issues you might have regarding output, equipment and installation.

IMPORTANT: A minimum of 25lbs of additional weight per side is recommended for Indoor use and 75lbs for Outdoor.

To avoid injury or damage to your **StepRepeat®**, do not assemble in windy conditions.
